

Entering Weaning/Yearling Weights

Log into your account

Go to My Performance

Choose Weaning or Yearling (which ever weights you are entering)

Change Display year to the year the calf was born and click Change

You will see a list of all of your animals.

If you want the animals in a certain order Click on the Column header of the column you want in order. ie (birth date you can go from oldest to youngest or click again and it will go from youngest to oldest)

Click on the word edit behind the animal you want to enter the weight on

Enter the Date and Management Group and click set

(This will be the date that shows up automatically for each animal you are entering weights under so you don't have to keep reentering the dates.) When you get to a different date or Management group, you can just reset a new date or Management Group

Under Horn Code- you can change any of the horn codes but if you need a new paper with any corrections you will need to send the original registration paper in and make the correction on it and then we will send you a corrected one. Please note: If you move an animal from horned to dehorned it will always show on the paper as horned.

Management Group- Please See the Explanation of Contemporary Groups found at www.shorthorn.org under Performance then under Performance Data
